ABOUT US...

Sturgis Tile Company, LLC was purchased by Troy Van Der Boom in April, 2006.

At the Sturgis location our crews are busy manufacturing prefabricated concrete tile.

Although originally used for well tiles, The tiles and lids are also used for "risers" on concrete septic tanks, cisterns, and well pits.

Our crews are at the Sturgis Tile location spring, summer, and fall. During the "off season" your phone calls will be forwarded to the Newell office (also Boom Concrete's office), and we will make arrangements to fill your product needs.
