FUEL CONTAINMENT TANKS

Oil Spill Prevention, Control, and Countermeasure (SPCC) Program - Fuel Containment Tanks

The goal of the SPCC program is to prevent oil spills into waters of the United States and adjoining shorelines. Oil spills can cause injuries to people and damage to the environment. A key element of this program calls for farmers to have an oil spill prevention plan, called an SPCC PLAN. These Plans can help farmers prevent oil spills which can damage water resources needed for farming operations.

As part of this Plan, farmers who store more than 1,320 gallons of fuel must add secondary containment systems to their fuel storage. The secondary containment must hold 110 percent of the largest tank's volume and the bottom and walls must have a permeability of less than .03 inches per day. Boom Concrete has precast concrete tanks ready for delivery to meet your containment needs.

Tank Prices	1200 CISTERN	STOCK TANK
1200 CISTERN \$550 STOCK TANK \$650 HALF CISTERN \$725 VAULT \$1300 Delivery and Set \$3.00/mile	560 Gallon 48" X 73" OD - 96" X 67" / ID - 88" X 59" / 1200 GALLONS	520 Gallon 50" X 61" 520 Gallon 50" X 61" OUTSIDE - 144" X 78" / INSIDE - 130" X 64" / 930 GALLONS
